CARIF

**Semi Automatic
Hydraulic Bandsaw – Italy**

320 BSA

This photograph shows the **CARIF** patented hydraulic downfeed system. The large lever sets the speed of the feed and the knob sets the pressure of the feed (relief valve). This means when cutting rectangular hollow section the saw is slower when cutting the top and bottom sections but accelerates down the sides.

- Shown with the optional "C" type pan and "A" type table

Cutting Capacity			
	∅ mm	▭ mm	∅ mm
90°	275	320 x 230 h	265
-45°	190	200 x 100 h	160
+45°	200	185 x 220 h	185
+60°	130	120 x 220 h	130

This photograph shows the simple operation panel. By pressing the green start button the saw will automatically hydraulically clamp the workpiece, start the coolant, power the bow down using the CARIF patented hydraulic downfeed system, rapid return to the raised position, stop the coolant and release the vice.
