

DURMA

4-Roll Plate Rolling Machines

Pre-bending, conical bending and ellipse bending can be made easily on the Durma hydraulic 4-roll plate rolling machine with CNC control

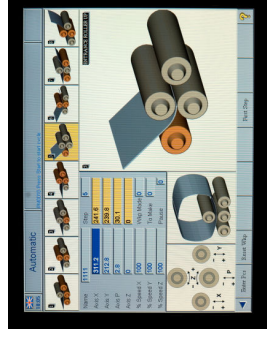

Conical and poly-centric bending precisely acquired by CNC control of 4 rolls

Parallelism of the bottom roll is achieved by strong torsion bar

Special design for cone bending and easy handling

- Bending Length 2 - 4 Metres
- Bending Capacity 6 - 65 mm

Contact us for a Quotation

- Graphical CNC controller with "teach-in" function.
- Mass produce with the "Auto Repeat" function.
