

DURMA

Turret Punching Machines

The "O" ring frame minimises deflection thus longer tool life. 27 stations with 3 auto index stations gives flexibility to this high performance machine. Loading and unloading systems is not a problem, Durma offers the complete package for minimal human intervention. If your job is simple and only requires a few tools then consider the very economical Durma punch press with 6 tool stations.

- 27 station turret including 3 indexing stations.
- Automatic sheet reposition. The 2 hydraulic jacks secure the work

- Ball and brush tables to prevent sheet marking

- Loading and unloading systems for low cost continuous manufacturing

The very powerful Siemens 840 DI control specifically designed for punching. A UPS system is included to protect against voltage fluctuations

Leabourn & Rose Ltd offer the complete turn key solution – Including graphic programming software with simple nesting and ready to receive files in .dxf format
